Performance Dataloader Lab/Field Loader

Fast, Reliable and Modern Solution

Performance Lab/Field Loader performs Upload, Batch Upload, Operator Defined Download, FIND and Information operations.

Reliability & Speed.
Multiple propriety methods have been added into our dataloader code base to reduce the frequency of failed loads and to optimize speed which produces a better operator experience.

Customizable & Flexible.
Performance can customize the UI for your specific needs. Solution is hardware flexible.

Superior Debugging.
Improved debug and logging capability.

Enables Automation.
Support for command line access and scripting APIs allow for automation of dataloading and can provide a test framework for verification of your dataloader client application.

Additional features:
- Support for ARINC 615A-2 and 615A-3
- Support for ARINC 665-1, 665-2, 665-3, and 665-4
- Support for ARINC 664 without additional hardware (works on standard customer PC)
- Performance intuitive UI for desktop and Windows tablets
- Windows 7, 8, 10 and Linux Host Platforms Supported
- Embedded products are developed to DO-178C
