## PERFORMANCE EMBEDDED DATALOADER CLIENT & SERVER PRODUCTS

FAST, RELIABLE AND COST-EFFECTIVE SOLUTION

### Performance Dataloader Solutions

Let Performance integrate our readymade modular, portable components and artifacts into your LRU program.

#### Fast Solution

Operational in a few months rather than years

#### Improved Operational Experience

Our proven components optimize speed and loading reliability

#### Significantly Reduced Costs

Compared to typical Dataloader development that cost multi-millions

### Typical Dataloader

An average LRU embedded 615A Dataloader Client is approximately 15,000 logical SLOCs and an average embedded 615A Dataloader Server is 25,000 logical SLOCs. When you factor in full DO-178C program costs for this many SLOCs, you are in the range of multi-millions of dollars and many years for schedule.

**Don't let your programs suffer from the typical Dataloader complaints like costly operations, slow speed, and poor reliability.**

#### Performance Dataloader Features:

- Performs Upload, Batch Upload, Operator defined Download, FIND and Information operations.
- Support for ARINC 615A-2 and 615A-3
- Support for ARINC 665-1, 665-2, 665-3 and 665-4
- Performance intuitive UI (if needed)
