

# PERFORMANCE CYBER SERVER

## A SECURE COMMUNICATIONS GATEWAY

- Customizable Low-Cost Communications Platform
- Cyber Secure Hardware & Software
- High Speed Data Transmission & Storage
- Quad Core Arm Processing Power

### READY FOR UAM & MISSION-CRITICAL APPLICATIONS

Jump start your communications solution with our secure communications gateway. Developed with the highest level of quality, safety, and reliability considerations. The Performance Cyber Server base product can be customized to meet your specific needs.

### HIGH PERFORMANCE COMPUTING

Provides data to support processing at the Edge in support of analytics and more as required by today's demanding applications. This includes a quad core, multi-threaded processor, high speed memory and storage, and expansion capability.

### REAL-TIME CONNECTIVITY

In the highly connected, high-tempo world of UAM/AAM, the Secure Communications Gateway connects and exchanges data between infrastructure, devices, and people through 4G/5G, WiFi, Bluetooth, SATCOM (Optional), and Gigabit wired ethernet.

### CYBER SECURE HARDWARE & SOFTWARE

Designed and hardened with the highest security considerations. This includes Red/Black Architecture, hardware-based root of trust using a built-in Trusted Platform Module, device level security mechanisms and operating system security.
