

## EDGE 5G-X™

The EDGE 5G-X™ offers a significant advantage for aviation Original Equipment Manufacturers (OEMs) that are looking to accelerate the development of a connected aircraft device to support applications such as Compute at the Edge for Data Analytics, Onboard Maintenance (OMS) and Data loading, Ground Based Communications, and more. Designed with a proven base platform, the EDGE 5G-X™ is agile and can be quickly customized to meet your specific needs, accelerating time to market.

### High-Performance Computing

Finally, a customizable solution built with a powerful base platform to seamlessly compute on the ground, in the air, and at the Edge.

### Optimized for Customization

Our expert aviation talent is ready to tailor our customizable and mature aviation grade hardware and software to support your unique Edge device needs.

### Cyber Secure

Designed and hardened with the highest security considerations including red/black architecture support, hardware-based root of trust, device level security mechanisms and operating system security.

### Trusted & Certifiable

Made in the USA by top-tier product development teams using high quality management systems, manufacturing, and product delivery – “ready for certification”.

## YOUR VISION. OUR HARDWARE. SEAMLESS SUCCESS.

Whether you need a certifiable hardware solution to support maintenance and recording, or resilient communication and analytics, the EDGE 5G-X™ is ready to be customized to meet your needs.

### Applications:

- ✓ Data Analytics
- ✓ Onboard Maintenance (OMS) and Data Loading
- ✓ Ground Based Communications
- ✓ Aircraft Interface Device (AID)
- ✓ Satellite Communications Backhaul
- ✓ Quick Access Recorder
- ✓ Routing
