

DATA LOADING MADE EASY

Data loading should just work. Yet, users frequently complain about the complexities, inadequacies, and unreliability of their data loading systems that result in wasted time, money, and frustration.

Introducing the **Performance Lab/Field Loader** - an ARINC-615A hardware-independent application offering intuitive interaction and the ability to perform data loading on your terms - wherever and however you need it. When ready, data loading should be a “fire-and-forget” action, and Performance Lab/Field Loader makes that a reality.

Through working with many aerospace companies, we have identified where to build-in configurability and flexibility resulting in solutions that are efficient, flexible, reliable, and in a word – EASY.

EFFICIENT

Thoughtful and modern design considerations make deployment, interaction, and execution seamless.

FLEXIBLE

Hardware-independent, built-in system configuration and scripting support lets you use it the way you need to.

RELIABLE

Fully ARINC-615A compliant and robustly defined software solution that is extensively and thoroughly regression tested.

LAB/FIELD LOADER

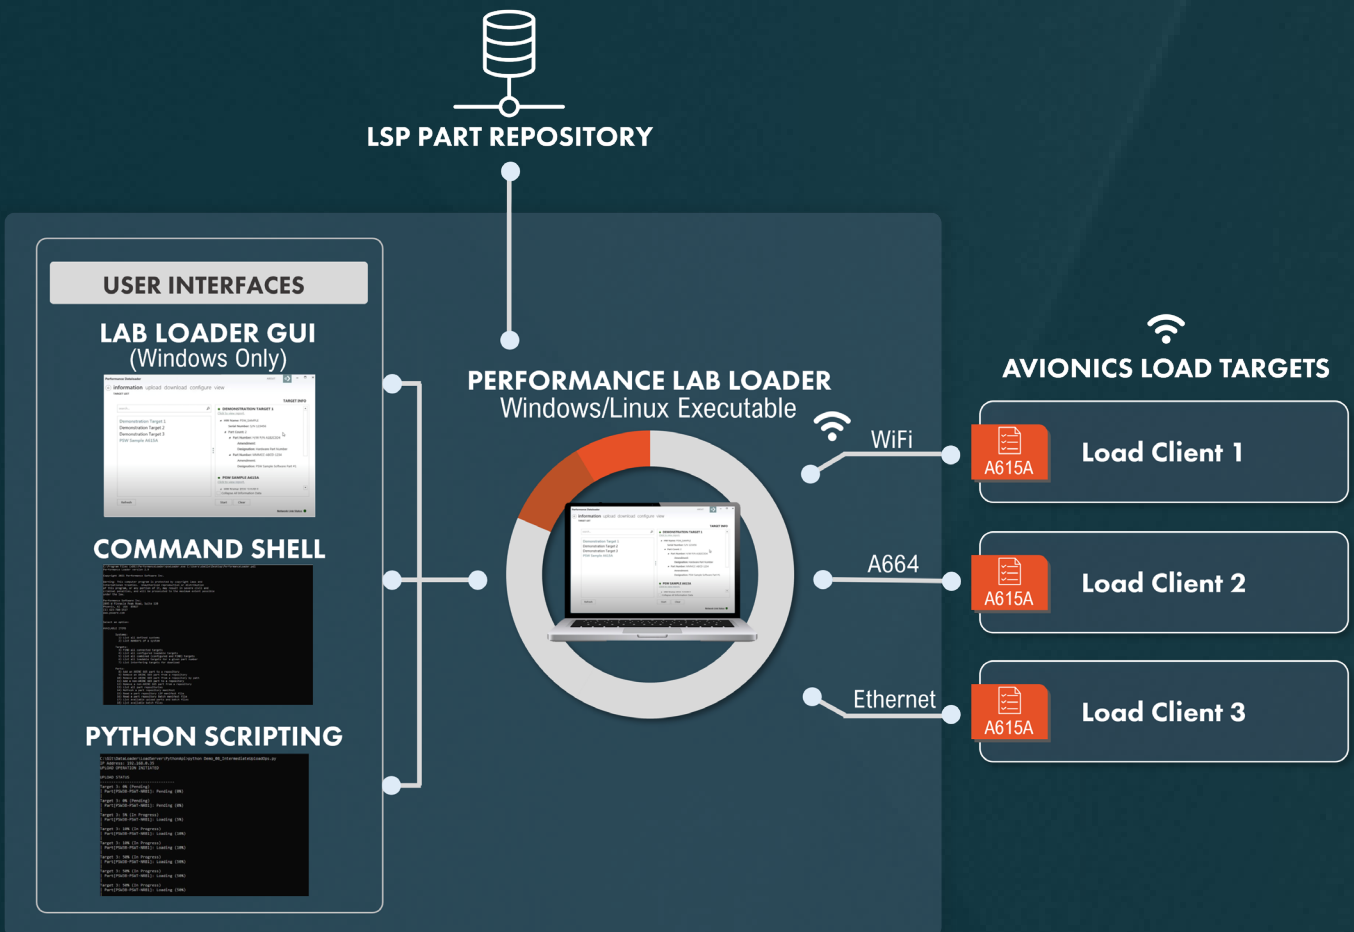

FEATURES

- Advanced configuration, logging and reporting
- Python scripting and Command Shell capable
- Windows 7/8/10 and Linux ready
- ARINC 615-2, 615-3, 615-4 compliant
- Supports loading ARINC-615A clients over:
 - Standard Ethernet
 - ARINC-664 (without additional hardware)

DIFFERENTIATORS

- Modern, intuitive graphical user interface
- ARINC 664 over standard Ethernet
- Hardware independent application
- Test automation framework support
- Error-injection for client verification
