

EDGE 5G-X™ DEVELOPMENT KIT

Performance's EDGE 5G-X™ Development Kit is an open platform hardware and software test stand providing developers an environment to accelerate their Data Analytics, Onboard Maintenance (OMS) and Data Loading, Ground-Based Communications, and other connected capabilities. By leveraging the EDGE 5G-X™ Card and adding powerful instrumentation including JTAG, developers have a robust "hands on" ability to test and integrate 5G and other technology for Aerospace, Defense, and Space.

High-Performance Computing

Finally, a customizable solution built with a powerful base platform to seamlessly compute on the ground, in the air, and at the Edge.

Optimized for Customization

Our expert aviation talent is ready to tailor our customizable and mature aviation grade hardware and software to support your unique Edge device needs.

Cyber Secure

Designed and hardened with the highest security considerations including red/black architecture support, hardware-based root of trust, device level security mechanisms and operating system security.

Trusted & Certifiable

Made in the USA by top-tier product development teams using high quality management systems, manufacturing, and product delivery – "ready for certification".

YOUR VISION. OUR HARDWARE. SEAMLESS SUCCESS.

Whether you need a certifiable hardware solution to support maintenance and recording, or resilient communication and analytics, the EDGE 5G-X™ Development Kit is ready to be customized to meet your needs.

Applications:

- ✓ Data Analytics
- ✓ Onboard Maintenance (OMS) and Data Loading
- ✓ Ground-Based Communications
- ✓ Aircraft Interface Device (AID)
- ✓ Satellite Communications Backhaul
- ✓ Quick Access Recorder
- ✓ Routing
