

PERFORMANCE ON-BOARD DATA LOAD CLIENT/SERVER

DATA LOADING MADE EASY

STREAMLINE DATA LOADING — WITHOUT THE HEADACHES.

Data load implementations are often underestimated, leading to last-minute decisions, budget overruns, and frustrated users. Tight timelines and complex requirements make it even harder for Project Managers to get it right.

MEET THE PERFORMANCE ON-BOARD DATA LOAD CLIENT/SERVER.

Built on decades of experience, our proven ARINC-615A Client and Server components dramatically reduce cost and development time. With robust requirements, reusable software, an integrated test framework, and streamlined processes, we make custom data load development fast, reliable, and painless.

AEROSPACE-GRADE

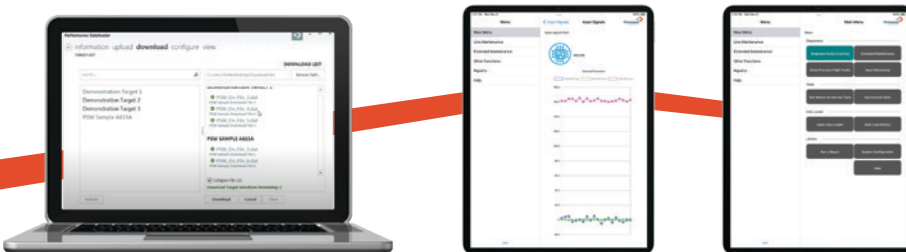

Receive a high-quality and certifiable solution based on robust requirements and continuous testing.

COST SAVINGS

Save millions compared to typical full lifecycle DO-178C development costs.

RAPID DEPLOYMENT

Build an operational data loader in months versus years using our proven components and services.

CLIENT/SERVER

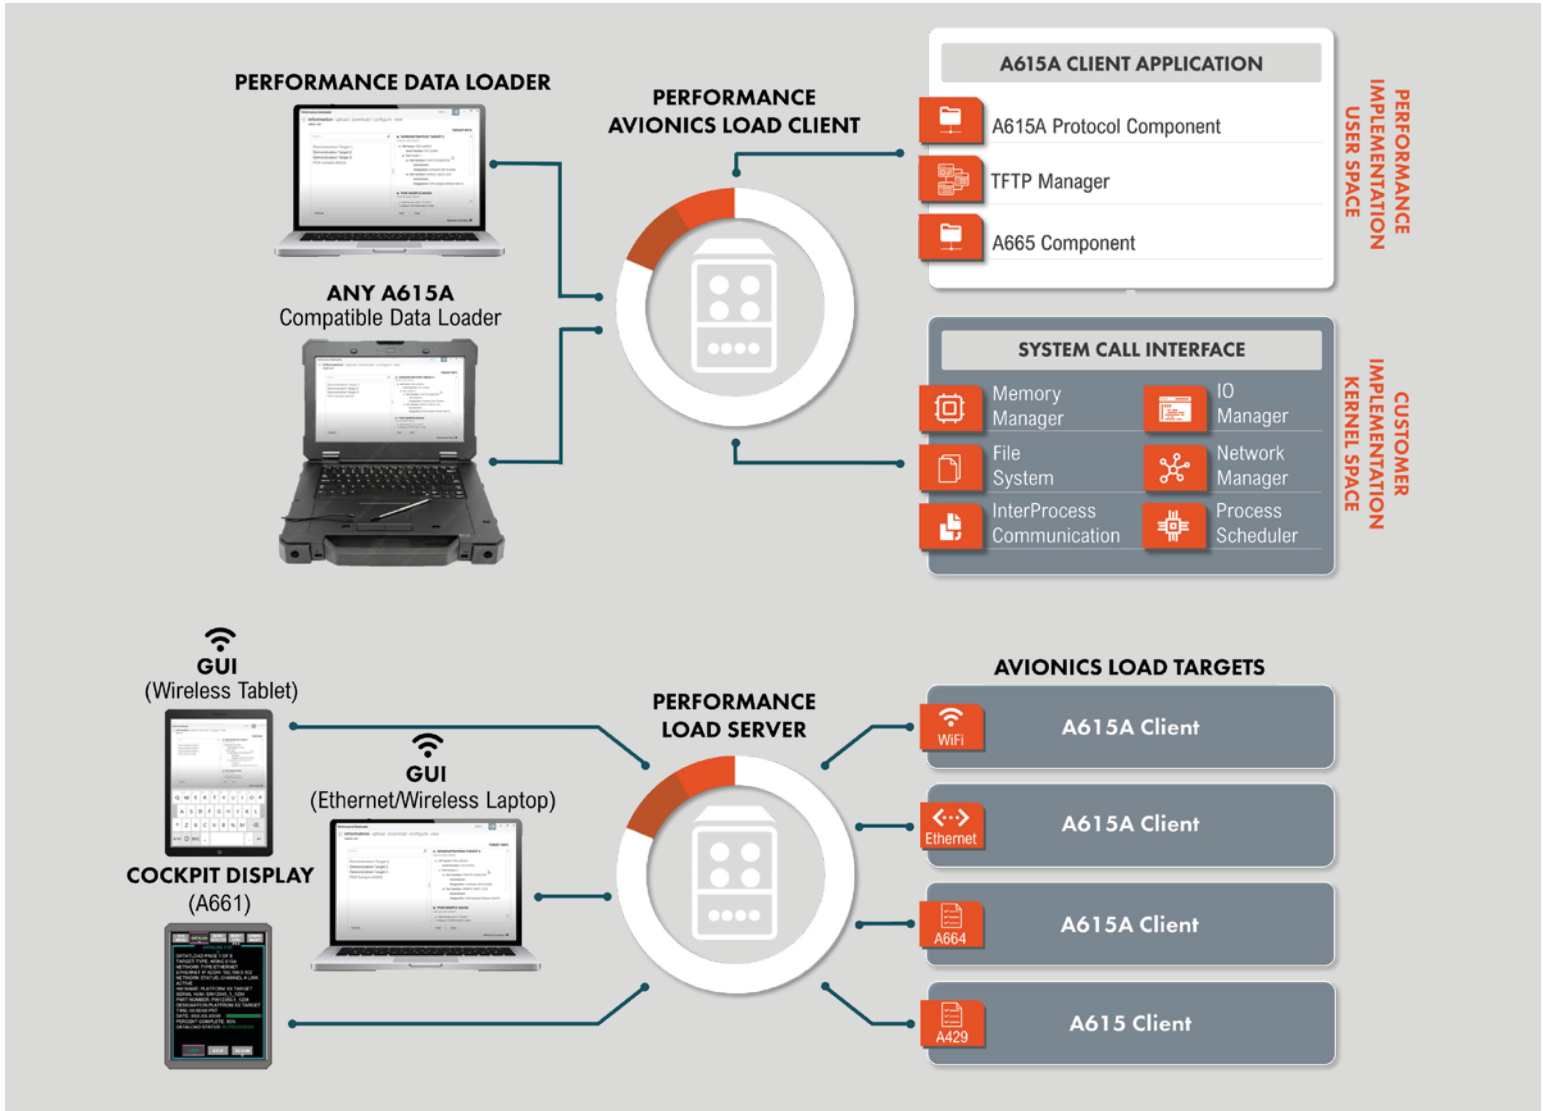

FEATURES

Performance Data Loader™ components provide ready-to use implementations of:

- TFTP protocol
- ARINC-615A protocol
- ARINC-665 load header file utilities
- ARINC-615 protocol (server only)

DIFFERENTIATORS

- Flexibility to integrate into any system
- Development and integration services
- Designed with speed optimization and quality
