

# PERFORMANCE LAB/FIELD LOADER

## DATA LOADING MADE EASY

### DATA LOADING DONE RIGHT.

Too often, it's complex, unreliable, and frustrating—costing time, money, and trust. That's why we built the Performance Lab/Field Loader: a hardware-independent, ARINC-615A-compatible application that gives you control, flexibility, and simplicity—on your terms.

### FIRE-AND-FORGET, ANYWHERE.

Designed for both lab and field environments, it delivers intuitive interaction and dependable execution, wherever and however you need it.

Backed by deep aerospace experience, we've engineered configurability where it counts—so data loading is no longer a challenge, it's **easy**.

### EFFICIENT

Thoughtful and modern design considerations make deployment, interaction, and execution seamless.

### FLEXIBLE

Hardware-independent, built-in system configuration and scripting support lets you use it the way you need to.

### RELIABLE

Fully ARINC-615A compliant and robustly defined software solution that is extensively and thoroughly regression tested.

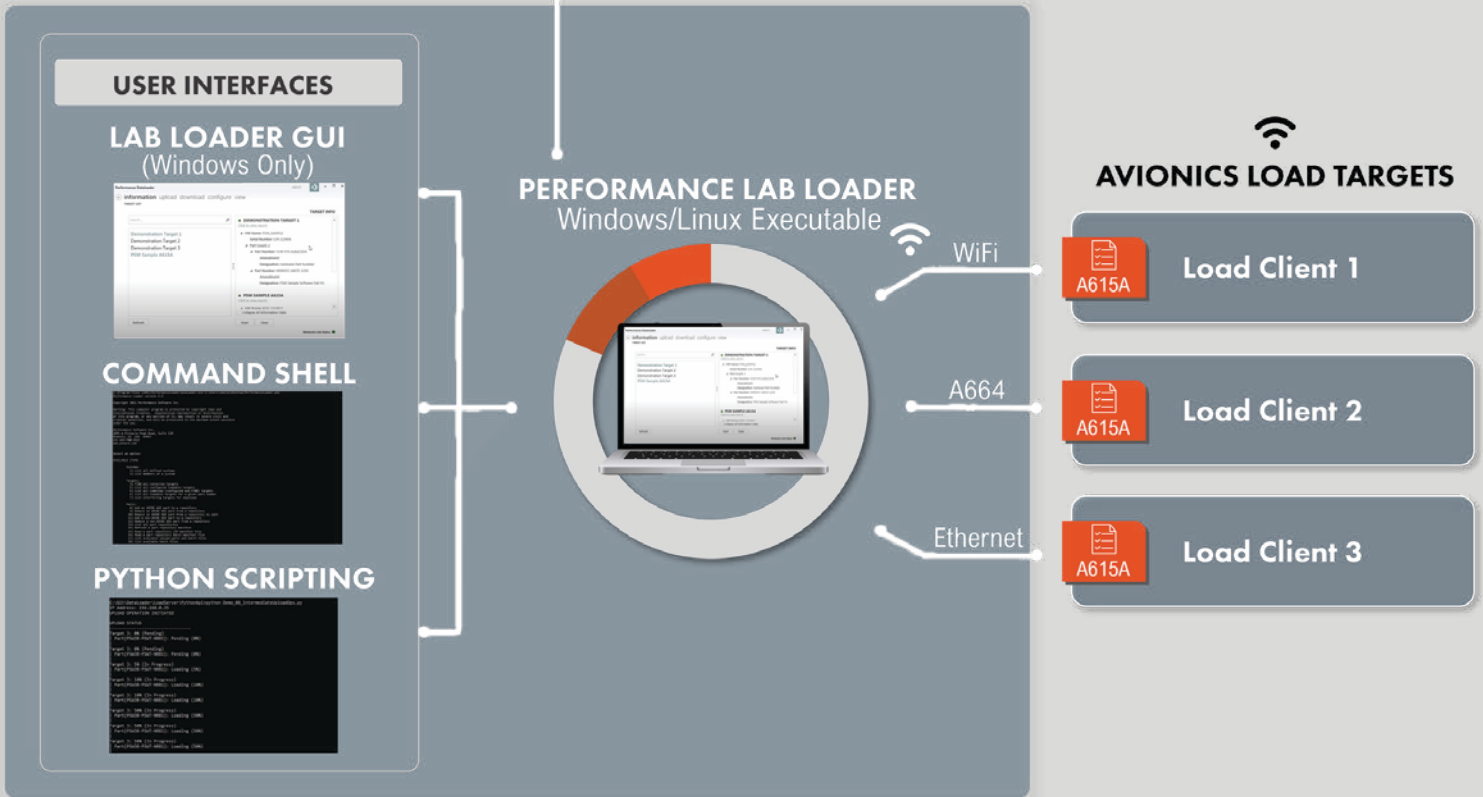

# LAB/FIELD LOADER

## FEATURES

- Advanced configuration, logging and reporting
- Python scripting and Command Shell capable
- Windows 7/8/10 and Linux ready
- ARINC-615A-2, 615A-3, 615A-4 compliant
- Supports loading ARINC-615A clients over:
  - Standard Ethernet
  - ARINC-664 (without additional hardware)

## DIFFERENTIATORS

- Modern, intuitive graphical user interface
- ARINC 664 over standard Ethernet
- Hardware independent application
- Test automation framework support
- Error-injection for client verification
